

# THIRUNAVUKKARASU THANGARAJ

Senior Software Developer & Team Lead | Full-Stack Developer

+91 8144002155    iamthiru.dev@gmail.com    Chennai, India  
[linkedin.com/in/thirunavukkarasu-thangaraj](https://www.linkedin.com/in/thirunavukkarasu-thangaraj)

## PROFESSIONAL SUMMARY

Full-stack software developer and team lead with 9+ years of experience designing and delivering enterprise web and mobile applications across rail, recruitment, healthcare and automotive sectors. Deep expertise in Java, Spring Boot and Angular, with specialised experience in event-driven and enterprise integration systems using Apache Camel, Apache Kafka, ActiveMQ Artemis and RabbitMQ. Hands-on with AWS, Microsoft Azure and Hetzner Cloud. Proven record of leading development teams and delivering mission-critical platforms for global clients including Alstom and Renault Nissan, improving system reliability, integration and operational efficiency.

## CAREER HIGHLIGHTS

- Designed and delivered an enterprise integration platform for Alstom's rail projects in Portugal and Spain, bridging Kafka, ActiveMQ Artemis and RabbitMQ with guaranteed delivery for mission-critical rail operations.
- Built core modules of GigSumo, a job portal and staffing platform, using Angular, Kafka, DynamoDB and Elasticsearch on AWS, supporting scalable candidate search and recruitment workflows.
- Delivered secure, real-time messaging for Care-online, a healthcare collaboration platform connecting physicians, agencies, patients and families.
- Led end-to-end delivery of 8+ logistics and vehicle-tracking applications for Renault Nissan India, digitising manual yard, transport and delivery processes.

## TECHNICAL SKILLS

### Languages & Frameworks:

Java   Angular   AngularJS   TypeScript   JavaScript   Ionic   HTML   CSS   Bootstrap

### Backend & Integration:

Spring Boot   RESTful Web Services   Apache Kafka   Apache Camel   ActiveMQ Artemis   RabbitMQ  
WebSocket   API Integration

### Mobile:

Native Android   Hybrid Apps (Ionic / Cordova)

### Cloud & Databases:

AWS   Microsoft Azure   Hetzner Cloud   Amazon DynamoDB   Elasticsearch   MySQL   PostgreSQL

### DevOps & CI/CD:

Git   GitHub   Jenkins   GitHub Actions   Docker   CI/CD Pipelines   Linux   Maven

## Security:

OAuth 2.0 / JWT

HTTPS / TLS

Role-Based Access Control

Secure API Development

OWASP Best Practices

## Practices:

Team Leadership

Payment Gateway Integration

Agile Delivery

## PROFESSIONAL EXPERIENCE

---

### Senior Software Developer & Team Lead — Mavens-I Softech Solutions, Chennai

Jul 2019 - Present

#### Alstom (Portugal & Spain) — Rail Interface Integration Platform

*Java, Spring Boot, Apache Camel, Apache Kafka, ActiveMQ Artemis, RabbitMQ, Microsoft Azure*

- Designed and developed an enterprise integration application enabling reliable communication between distributed rail systems across Alstom's Portugal and Spain projects.
- Implemented Apache Camel routes to mediate, transform and route messages across Kafka, ActiveMQ Artemis and RabbitMQ, bridging heterogeneous protocols and message formats.
- Ensured guaranteed delivery, error handling and message reconciliation across the integration layer, supporting mission-critical rail operations.

#### GigSumo — Job Portal & Staffing Platform

*Angular, Apache Kafka, Amazon DynamoDB, Elasticsearch, MySQL, AWS*

- Developed core web modules streamlining job search, candidate management and recruitment workflows for recruiters and job seekers.
- Built responsive Angular front-end features integrated with Kafka-based event-driven backend services, with Elasticsearch powering fast candidate and job discovery.
- Deployed and maintained services on AWS, contributing to scalable performance across the platform.

#### Care-online — Collaborative Healthcare Platform

*Angular, Apache Kafka, Amazon DynamoDB, Elasticsearch, MySQL*

- Implemented secure, real-time messaging and Angular interfaces supporting communication between physicians, agencies, patients and families.
- Focused on data privacy, reliability and responsiveness to support coordinated patient care.

#### Renault Nissan India — Vehicle Logistics & Operations Suite (8 applications)

*Angular, Ionic, Native Android, Spring Boot, PostgreSQL*

##### DVT — Digital Vehicle Tracking *(Angular web + native Android, Spring Boot, PostgreSQL)*

- Built a vehicle tracking solution to track newly manufactured cars after QA testing while parked in the yard, capturing location, status and movement across the storage yard.
- Improved real-time visibility and traceability of finished vehicles for plant and logistics teams.

##### DTO — Digital Transport Order *(Android SDK, Spring Boot, PostgreSQL)*

- Developed the Android application used for loading manufactured cars onto transport trucks, managing transport orders, vehicle assignments and loading confirmations.
- Digitised a previously manual process, reducing errors and improving coordination between yard and transport teams.

### **ePOD — Electronic Proof of Delivery (Dealer Application)** *(Android SDK, Spring Boot, PostgreSQL)*

- Enabled dealers to inspect delivered vehicles on arrival, documenting damages or missing parts with photographic evidence transmitted to transporters.
- Strengthened accountability and simplified dispute resolution across the vehicle delivery chain.

### **Transporter Application** *(Android SDK, Spring Boot, PostgreSQL)*

- Built an Android app allowing transporters to accept or reject assigned transport tasks on the move, with real-time task allocation, status updates and confirmations.
- Enabled faster task turnaround and clearer communication between logistics coordinators and transporters.

### **LTSM — Long Term Maintenance System** *(Android SDK, Spring Boot, PostgreSQL)*

- Built scheduling, reminders and service-history tracking for periodic vehicle maintenance every three months, improving maintenance compliance and record-keeping.

### **MOM — Minutes of the Meeting (RNAIPL)** *(Angular, Spring Boot, PostgreSQL)*

- Implemented features to capture, organise and circulate meeting minutes, action items and follow-ups, improving accountability for action tracking across teams.

### **NLTH — Nissan Leasing Thailand Stock Auditing** *(Angular web + Ionic mobile, Spring Boot, PostgreSQL)*

- Built inventory management and audit workflows to manage and reconcile leasing stock across multiple locations, improving inventory accuracy and auditing efficiency.

### **Stock Auditing System — RNDBCI** *(Angular web + Ionic mobile, Spring Boot, PostgreSQL)*

- Developed audit capture, verification and reporting features to streamline periodic stock counts, enhancing data accuracy and reducing manual effort.

## **Software Developer (Mobile & Web) — Vega Intellisoft Pvt Ltd, Chennai**

Jul 2018 – Jun 2019

- Developed mobile and web applications across the full development lifecycle as a vendor at Mavens-I Softech Solutions.
- Built native Android and Angular front-ends integrated with Spring Boot RESTful APIs and relational databases; contributed to implementation, testing and bug fixing.

## **Ionic Developer — Bestshine Education Campus**

Sep 2017 – Jun 2018

- Developed a hybrid education-management application (Ionic, Cordova, AngularJS, MySQL) serving management, teachers, parents, students and drivers from a single codebase.
- Built an Android transport app for school bus drivers covering routes, student lists and attendance, improving safety and coordination of daily transport operations.

## **Android Developer — Bluedyne Software Pvt Ltd**

Sep 2016 – Sep 2017

- Developed an insurance recommendation Android application (Android SDK, Java, MySQL, PHP), gaining foundational full-stack and mobile development experience.

## **EDUCATION**

### **Bachelor of Engineering (B.E.)**

Computer Science & Engineering  
Priyadharshini Engineering College, Anna  
University, India

## **LANGUAGES**

- English — professional working proficiency
- Tamil — native

## **REFEREES**

Available on request.
